There will be computers in the building that will allow staff to access emails, complete support planning and training.

The Gateway project will be starting building works in 2014 and the works will change the way it looks and feels and will open it up for more use, as well as making it a bright welcoming space.

We also want to make sure Service Users and Staff get involved in choosing things such as the new kitchen, the colours and the furniture.

We want to make sure that there are facilities that meet the needs of people with complex disabilities and so this new town centre hub will also have a Changing Place, with a hoist and changing bed.
This is what it might look like

- Gateway
- Library
- Shops
- Table Tennis
- Cooking
- Days out
- Boccia
- Getting around
