NICKOLLS QUARRY (MARTELLO LAKES),
OFF-SITE HIGHWAY WORKS
Aldington Road, Lympne Hill,
West Hythe Road
Traffic Calming Scheme

Public Consultation

Where is the work intended to take place?
Along Aldington Road between Stone Street and Lympne Hill, along Lympne Hill and West Hythe Road, as summarised on the corresponding location Plan – drawing number ML-CAP-TC-XX-DR-C-1008.

Why do we want to carry out this work?
At the time of the original planning consent for the redevelopment of Nickolls Quarry it was considered and agreed that a traffic calming scheme would be undertaken and the provision of these works are a condition of that planning consent. Works referenced include traffic calming such as speed cushions and speed tables. This has led to Camland Development working with Kent County Council to develop a traffic calming scheme within this area.

What does the scheme involve?
The scheme, as shown on drawing number CS/072621/TC/1007 Rev P09.

The Traffic Calming Scheme in Lympne comprises the following:

- A raised table junction at Aldington Road/ Stone Street;
- A new 40mph speed limit on the east approach to the village;
- Two sets of speed cushions in Aldington Road with a kerbed build out;
- Revised street lighting along Aldington Road

The Traffic Calming Scheme in West Hythe comprises the following:

- A new 40mph speed limit on north approach to village;
- Speed cushions and speed tables along West Hythe Road;
- An extension of 30mph speed limit southwest onwards;
- Revised street lighting along West Hythe Road

Scheme Implementation
This information is being provided to raise awareness of the proposed improvements, which have been discussed previously with representatives of the Town Councils, Residents of West Hythe Road, Emergency Services and the Bus Company. We would like to hear from you should you wish to support these proposals or should you have any related concerns or points that you feel are appropriate to be considered as part of the progression of the scheme. Please take time to complete and post the separate feedback form for your views to be registered.

Following on from this consultation the detail design will be progressed, taking into consideration the feedback from this consultation. Subject to the corresponding agreements and traffic orders being in place it is anticipated that construction will commence during late-Autumn 2016. These works would be undertaken by a
contractor approved by Kent County Council (Highways & Transportation) with the costs of the works fully funded by Ward Homes as the developer of the residential scheme.

How to contact us?
For further information please call Kent Highway Services on 03000 418181, quoting Martello Lakes, Off-site Highway Works. You can also use the contact details below for returning any formal written views on the traffic calming scheme, or e-mail shepway.highwayconsultations@kent.gov.uk to be received by no later than Thursday 31st March 2016.
